

Mine Activities

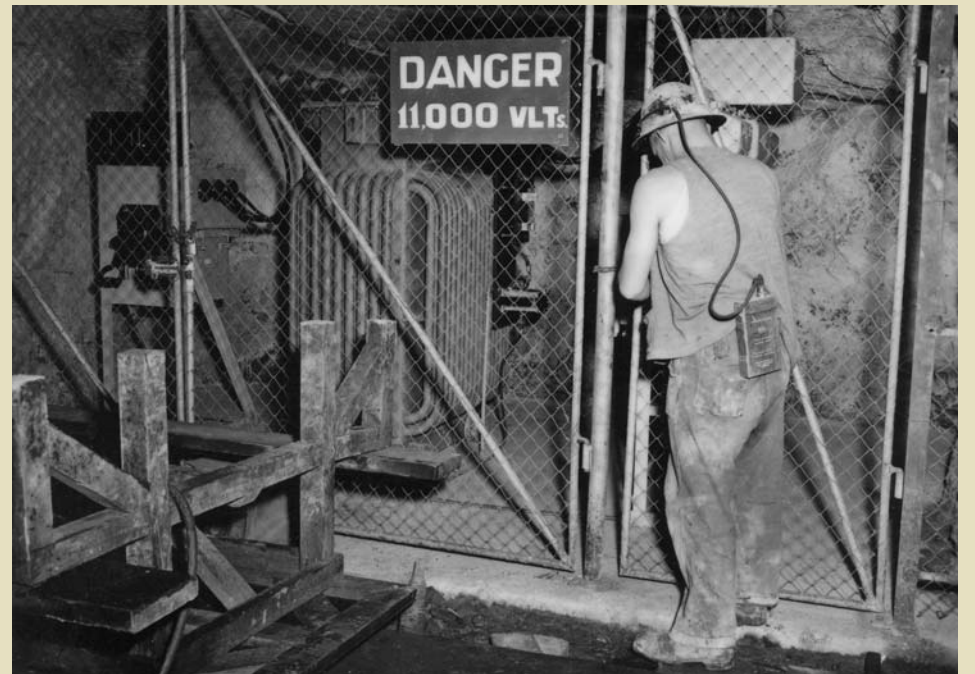

Above: Bronte Wyndyz serving a miner with a box of gelignite explosives from an underground store room.

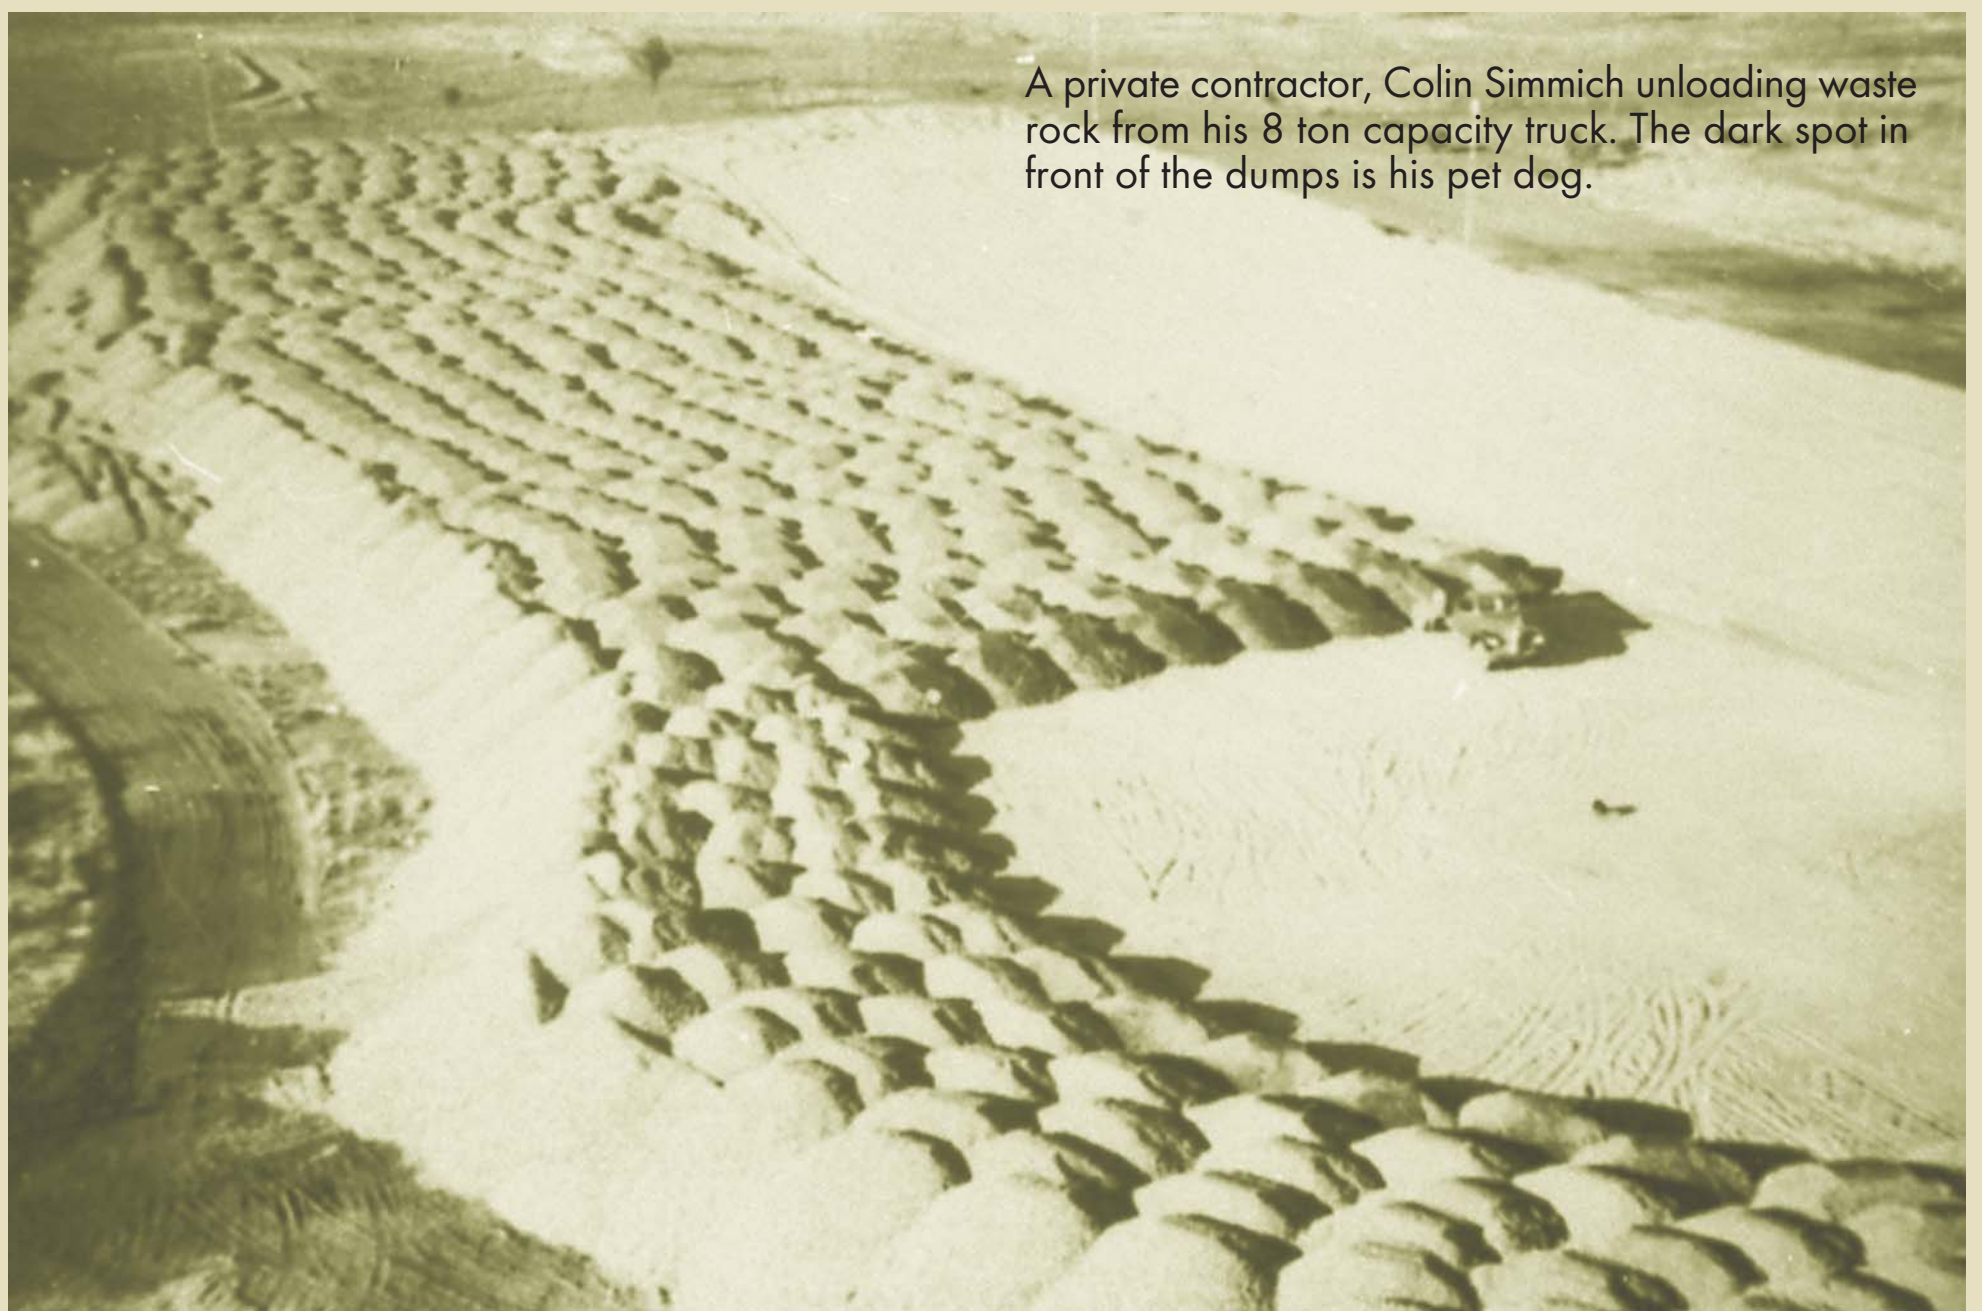

Above: A miner using an air operated Eimco mechanical bogger to clear his drive face after firing a round of explosives underground.

Above: Unloading a side tipping ore truck onto a grizzly above an underground ore pass.

Above: An underground electrical transformer station built into the side of a drive (tunnel).

A private contractor, Colin Simmich unloading waste rock from his 8 ton capacity truck. The dark spot in front of the dumps is his pet dog.
